

OUTSIDE LANGGRAPH — routing

invoke compiled graph

INSIDE LANGGRAPH — shared agent / tools / validator loop

return final state

tool stack calls out to:

OUTSIDE LANGGRAPH — external providers called by tools

OUTSIDE LANGGRAPH — presentation

* get_stock_history is agent-callable directly only in the technology profile; pharma reaches it internally via compute_pharma_comparison_scores.
† get_financial_metrics has no @tool decorator and is never agent-callable directly - both scoring tools call it internally, in plain Python.
